EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please enter the after final amendment filed February 23, 2004.

Applicant's arguments, see Appeal Brief, filed May 24, 2004, with respect to the denial of the entry of the after final amendment filed February 23, 2004 have been fully considered and are persuasive.

The following is an examiner's statement of reasons for allowance: the overall claimed combination of an absorbent article comprising a thermal cell actuator which adds or removes heat from a portion of the absorbent article so as to result in one of several recited functions and a triggering mechanism connected with the thermal cell actuator wherein a non-urine based signal causes the thermal cell actuator to add or remove heat from at least a portion of the article has neither been anticipated nor rendered obvious by the prior art of record.

Art Unit: 3761
